FORMEL+SKIN

This presentation offers a comprehensive case study for the Data Analyst (OPS & Finance) position, providing an overview of our company and highlighting the key responsibilities and strategies linked to this role. The following slides will demonstrate how you can play a crucial role in advancing our product initiatives

Data Analyst Position

Case study

Description

- Prepare a presentation for the interview panel, addressing the questions listed on the upcoming slides
- The panel will include:
  - Vlad, Head of Business Intelligence
  - 1-2 Data Analysts
- The presentation will take place at the Formel Skin office in Berlin
- You have one week to prepare and submit your presentation

  Your presentation will be displayed on a monitor.
- Please let us know if you bring your own laptop.
- Share the presentation as a PDF file 24 hours prior to your interview, so the panel can review it in advance.
- The data for Tasks 1&2 is here.

Task 1. Financial Reconciliation

Context:
Our finance team needs to reconcile revenue between our internal order system (backend) and our invoicing system. At the end of last month, we noticed a discrepancy - the backend shows more revenue than what was invoiced. This creates problems for financial reporting, tax compliance, and understanding our actual cash position.

You are provided with:

- orders.csv — all orders from our internal system (order_id, customer_id, product_name, order_date, order_paid_date, user_country, order_currency, order_amount, refund_amount, order_status)
- invoices.csv — all invoices generated by the invoicing system (invoice_id, order_id, invoice_date, refund_date, total_invoice_gross, invoice_currency, refund_amount, invoice_status)

Your tasks:

1. Reconcile the two datasets: identify orders that are missing invoices, invoices that don't match order amounts, or other discrepancies
2. Quantify the gap - what's the total value of unreconciled transactions? Break it down by discrepancy type
3. Identify patterns - are certain order types, time periods, or amounts more prone to issues?
4. Write SQL logic (or dbt model structure) that would run this reconciliation automatically on a regular basis and flag issues
5. Recommend 2-3 concrete process improvements to prevent reconciliation issues going forward

Task 2. Operations Performance Dashboard

Context:
The operations team has been under pressure lately. Customer complaints about delivery times are up, and leadership wants visibility into what's actually happening in fulfillment. Right now, they're flying blind — no dashboards, just gut feel and occasional Excel exports.

You are provided with:

- The same orders.csv dataset from Part 1
- consultations.csv — support tickets related to delivery (consultation_id, customer_id, order_id, consultation_date, assignee, consultation_type, resolution_time, current_status)

Your tasks:

1. Define a metrics tree: What are the 5-7 KPIs that operations should track to understand fulfillment performance? Explain why each matters and how they relate to each other.
2. Write SQL queries (or describe dbt models) to calculate these metrics
3. Design a Looker dashboard mockup (sketch/wireframe is fine) showing how you'd present these metrics to the OPS team
4. Based on the data provided, share 2-3 actionable insights or red flags you'd highlight to the operations manager

Presentation Guidelines

Structure your 30 - 35 minute presentation however makes sense to you, following by the questions. Make sure to cover:

- Your investigative process (how you approached the problems)
- Key findings and supporting data
- Recommendations with clear reasoning
- Any assumptions you made or limitations in the analysis

What we're looking for:

- Clear thinking and structured problem-solving
- Ability to translate data into business insights
- Communication skills - can you explain technical work to non-technical stakeholders?
- SQL/analytical rigor
- Understanding of both finance and operations contexts

Tools: Use whatever you're comfortable with - SQL, Python, spreadsheets, BI tool mockups, slides, etc.

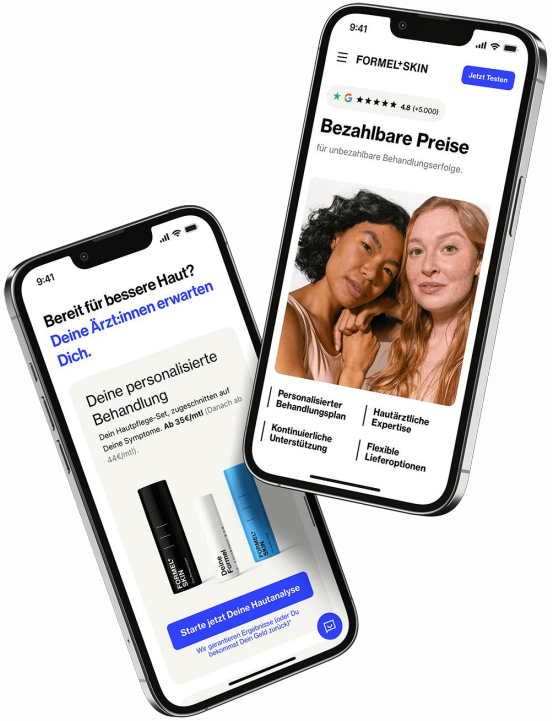
Questions? Feel free to reach out if anything is unclear. We're interested in seeing how you think, not just the "right answer."

Head of Performance Marketing Position

Appendix

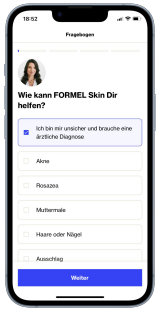
Our vision is to build the #1 dermatologist

- More accessible
- Better outcomes
- Loved by patients



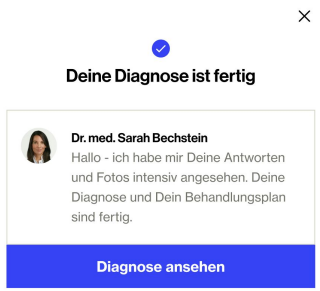
In only a few steps, customers received personalized treatments to their doorstep

Medical case upload (digital)



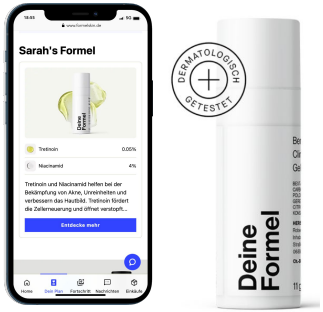
The Patient fills out a digital medical **questionnaire** and **uploads pictures** of the affected skin area

Diagnosis & Treatment Plan selection



The doctor provides a **diagnosis and individualizes a treatment plan** for each patient

Personalised FORMEL SKIN treatment



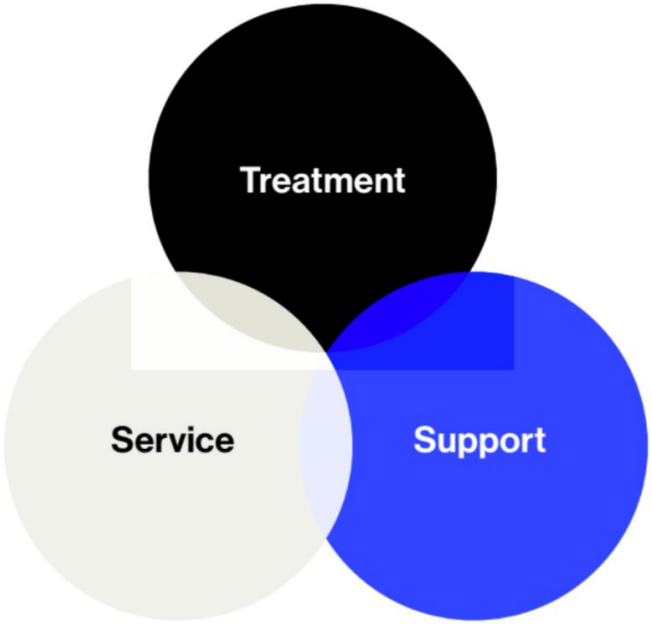
Medical check-in (every 4-weeks)

Ongoing medical support

- The **personalized treatment is delivered** directly to patients (including a **prescription grade 'Formel'** prepared in pharmacies)
- Every **4 weeks the patient checks in** (the patient uploads photos and provides information regarding the treatment progress)
- Based on the check-in the **therapy and the 'Formel'** are **adjusted**
- There is **constant doctor's support** for each patient throughout the treatment

FORMEL SKIN treatments

Brand values & USP



+ Most effective treatment:

Expertise instead of experiments

- We provide personalised dermatological treatments that work.
- We focus on simplicity, powered by the right active ingredients.
- We follow no hypes. We offer solutions based on scientifically proven methods.
- We conducted over 500k treatments within the last three years. We know what we do.

+ Best support through experienced doctors:

Through breakouts and breakthroughs

- Our doctors' number 1 priority is your skin health.
- Our doctors educate to empower you throughout your entire journey.
- Our doctors are here for you whenever and for whatever you need them.
- Our doctors are real.

+ Dermatological care accessible to everyone:

Short term appointment for long term result

- We provide a holistic dermatological service – if needed, to your door.
- We are accessible to everyone. no matter where you are.
- We value your time and guarantee fast access to our doctors – on average within 24h.
- We make dermatology affordable for everyone.

Product and pricing architecture

Auto-Refill

- Medical ‘Formel’ (Rx) + cosmetics
- Medical and prescription fee + delivery fee included
- Regular check-ins followed by Formel adjustments
- Product set delivered automatically based on selected delivery interval:
  1-month-set (49€)
  delivery of product set on a monthly basis with according product sizes
  2-month-set (44€)
  delivery of product set on a bi-monthly basis with according product sizes

Single Purchase

- Medical ‘Formel’ (Rx) + cosmetics
- Medical and prescription fee + delivery fee included
- One-time delivery without ‘Formel’ adjustments
- Price: 59€ (one-off)

Prescription

- Diagnosis + prescription
- No product set nor further medical services
- Price: 20€ (one-off)

Target Group

- Skin issues, e.g. acne, rosacea, wrinkles and fine lines, melasma/ hyperpigmentation, skin impurities
- Moderate severity of skin issues
- German market
